### ABOUT

Throughout my studies, I have become increasingly passionate about Architecture and design, developing skills in creative thinking and BIM modelling. I am now looking to put my skills and knowledge to work and gain practical experience.

Working on several projects and a variety of conceptual projects during my degree has equipped me with significant software skills, including significant proficiency in Revit and Arcchicad. In addition, my experience working as a sales representative for more than 5 years in the sales retail sector has allowed me to develop great written and verbal communication skills.

I have also had the opportunity to work on industry projects as a research assistant, where I gained practical experience and was exposed to the greater building & design industry.

Through my studies and employment, I have found that I have a desire to do meaningful design work that supports people and communities. That there is a need for positive environmental change within architectural design far beyond aesthetics. To design in a way which is sustainable and enduring. To make spaces which are accessible, efficient and welcoming.

### ACADEMIC

- Dec 2022** ○ **Graduation of B.Arch Undergraduate Degree**
- Oct 2022** ○ **Coursework Finishes**
- Dec/March 2022** ● **Research Assistant for Griffith University**  
Worked on the Tourism Master Plan Redevelopment for Etheridge Shire, QLD
- Sept/Dec 2021** ● **Research Assistant for Griffith University**  
Started the Thomas Jack Park Redevelopment Project in Dalby, QLD
- 2021** ● **Year Two: B. Arch Undergraduate Degree**  
GPA: 6.25  
Work chosen to be displayed at the Annual Architecture, Design and Planning Exhibition
- 2020** ● **Year One: B. Arch Undergraduate Degree**  
Griffith Award for Academic Excellence
- 2019** ● **Queensland Certificate of Education (QCE)**  
All Saints Anglican School  
OP 5 (QTAC rank equivalent of 92)

## EXPERIENCE

### Research Assistant/Designer

*Griffith University & Etheridge Shire Council (2022)*

I was involved in a industry project along with PhD students and select peers. Based in North Queensland, we were invited up to the shire to evaluate the existing tourism facilities, and to propose new buildings and structures which would facilitate the growing tourism within the shire. After consulting with council and various different tourism owners and operators, we presented our findings and proposal. For this project, my main task was to design a cafe extension to the existing museum which would reflect the natural history and natural geography of the shire.

#### Project Roles:

Consultation: interviewing stakeholders including; tourism operators, council and local business owners.

Design: the complete concept proposal of a cafe in Georgetown, Qld. This included floor plans, sections, perspectives and fly-throughs.

Presented the proposals to council.

### Research Assistant/Designer

*Griffith University & Western Downs Regional Council (2021)*

I was involved in a real industry project along with a select students which involved the redevelopment of Thomas Jack Park in Dalby. This project focused on community consultation throughout the design stages. This project allowed me to interact with real stakeholders and constraints.

#### Project Roles:

Community consultation; interviewing and documentation of stakeholders

Designing; the initial and final stage concept proposals

Costing; calculated cost estimates of the project

Presented the proposals to council.

### Sale Representative

*Fabric Frenzy (2017- 22)*

Working within a small business, I have gained many skills from my many roles from management to service. This job was great in not only diversifying my skills but has significantly developed my communication and collaboration skills which are integral when working in a team environment. I was responsible for many tasks including the sale of sewing machings up to the RRP of \$25,000

#### Job roles:

Inventory, stock-take, invoices, receiving and dispatching orders & POS

Digital marketing, website and social media management

Client/customer service

### TECHINICAL SKILLS

Photoshop
