ABOUT

Recently completing my undergraduate degree in architecture, I am excited to find a firm and role within the industry where I can make an impact and further enrich my knowledge and skills. I have become increasingly passionate about Architecture and design, developing skills in creative thinking and BIM modeling. Throughout my experiences working as a designer and research assistant for community focused projects, I gained practical experience and was exposed to the greater building & design industry. Also gaining a well-rounded breadth of knowledge and experience regarding public and commercial spaces.

Working at an interiors store as a design consultant has further developed my skills in interior design. Along with my 5 years of experience working as a sales representative for more than 5 years in the sales retail sector has allowed me to develop great written and verbal communication skills.

Through my studies and employment, I have found that I have a desire to do meaningful design work that supports people and communities. That there is a need for positive environmental change within architectural design far beyond aesthetics. To design in a way which is sustainable and enduring. To make spaces which are accessible, efficient and engage with the surrounding urban fabric effectively.

ACADEMIC

TECHNICAL SKILLS

Photoshop		Revit		Enscape	
Illustrator		Archicad		Twinmotion	
Indesign		Sketchup		Unreal Engine	
Microsoft		Rhino		Lumion	

EXPERIENCE

RESEARCH ASSISTANT/DESIGNER

Etheridge Shire Council & Griffith University(2022)

I was involved in an industry project along with Ph.D. students and select peers. Based in North Queensland, we were invited up to the shire to evaluate the existing tourism facilities, and to propose new buildings and structures which would facilitate the growing tourism within the shire. After consulting with the council and various different tourism owners and operators, we presented our findings and proposal.

Project Roles:

- Consultation: interviewing stakeholders including; tourism operators, council, and local business owners.
- Design: the complete concept proposal of a cafe in Georgetown, Qld.
- Presented the proposals to the council. This included floor plans, sections, perspectives, and fly-throughs.

RESEARCH ASSISTANT/DESIGNER

Western Downs Regional Council & Griffith University (2021)

I was involved in a real industry project along with a select students which involved the redevelopment of Thomas Jack Park in Dalby. This project focused on community consultation throughout the design stages. This project allowed me to interact with real stakeholders and constraints.

Project Roles:

- Community consultation, interviewing and documentation of stakeholders
- Designing the initial and final stage concept proposals
- Calculated cost estimates of the project & presented the proposals to council.

DESIGN CONSULTANT

Voyager Interiors (2023)

In my current role, I am a design and sale consultant for high end Italian designed and made furniture. In this role, I am actively looking and consulting with clients for furniture selection for whole projects, rooms or individual items. This role is quite interesting as it has taught me significantly about the design of interior spaces and has a wide range of different clients including homeowners, interior designers, architects and builders.

Job Roles:

- Consulting on interiors with interior designers, architects, buildings and home owners
- Visual Merchandising and configuring of showroom to display items.
- Presenting proposed furniture selection including; floor plans, concept perspectives and other visual aids to clients.
- Assisted on presentations for projects with budgets up to \$250,000 for furnishing

SALE REPRESENTATIVE

Fabric Frenzy (2017- 22)

Working within a small business, I have gained many skills from my many roles from management to service. This job was great in not only diversifying my skills but has significantly developed my communication and collaboration skills which are integral when working in a team environment. I was responsible for many tasks including the sale of sewing machines up to the RRP of \$25,000

Job roles:

- Inventory, stock-take, invoices, receiving and dispatching orders & POS
- Digital marketing, website, and social media management
- Client/customer service
